

Kima Cegamo

Senior Full Stack Dev

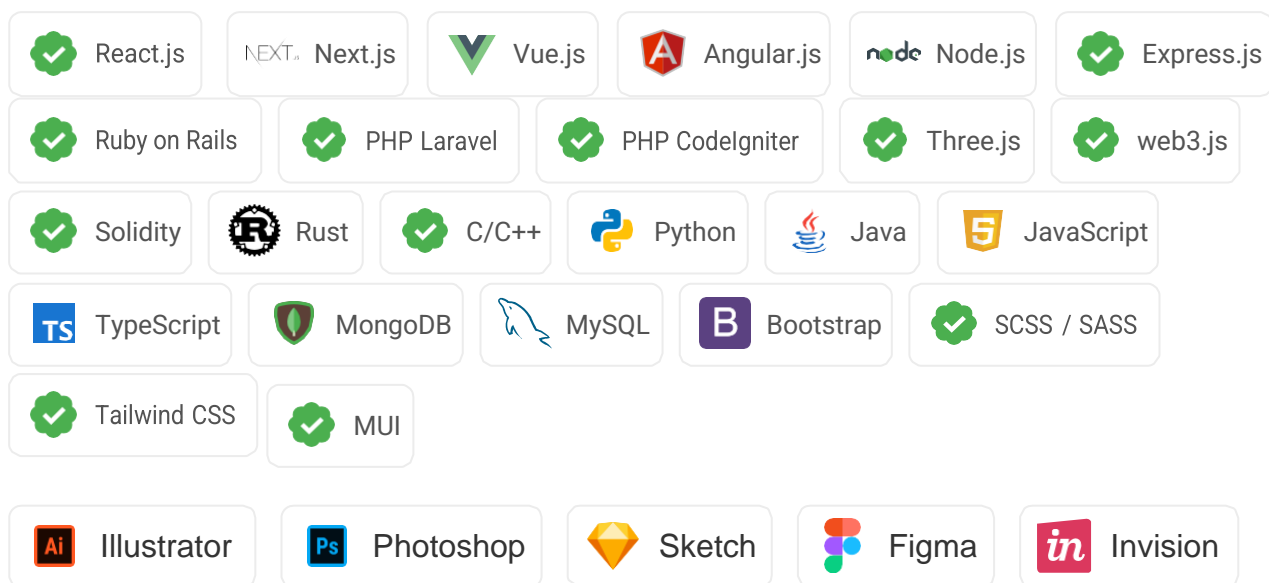

Lidzbark Warminski
Poland

I am a passionate Software Developer who creates products that are functional, meaningful, and beautiful. I have seasoned with 10years in industry of Software development.

My main priority is to maintain high quality of code from day one. I use the best tools, processes, design patterns, Clean Code and SOLID principles of software development to ensure the best results for my clients.

I seek to simplify the relationship between people and interactive products while also always taking into consideration the business goals and technological constraints. I believe that small interactions can make a big difference in people's lives.

Skills

Portfolio

eCommerce Website

- Architected platforms to function seamlessly for dozens of clients.
- Managed client requests so that improvements requested by one client were available to all clients.
- Integrated with multiple ERP systems including iSync, BrightPearl, and AX.
- Integrated with multiple payment providers, including CyberSource, Authorize.Net, PayPal, and Braintree.

<https://Botb.com/>

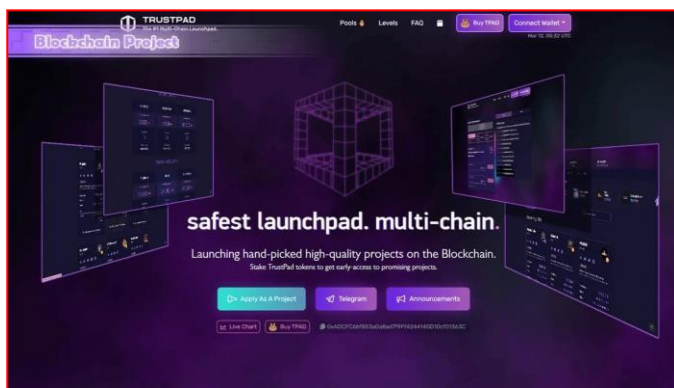

Photo showcase Website

- Assisted in the analysis and definition of business requirements, and translated deliverables into best-in-class web-based applications using Laravel, SQL, and JavaScript.
- Administered an entire site from the graphical setup of the front page to the back-end transaction processing, reporting, customer service, and data entry interfaces.

<https://alphacoders.com/>

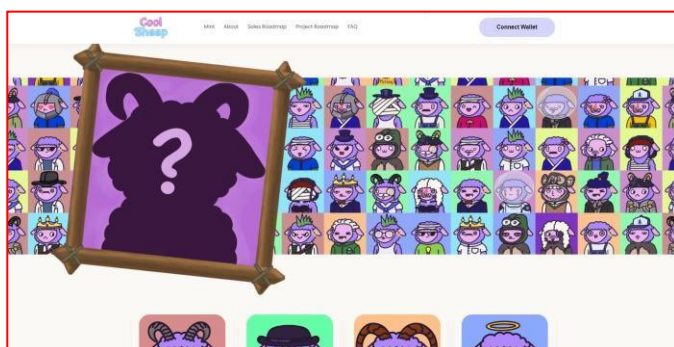

Blockchain Platform

- Integrated REST APIs for feature improvements leading to a 20% increase in daily user engagement.
- Maintained and developed upon the entire Solidity stack. Managed several smart contract developers to coordinate feature implementation, code reviews, and protocol improvements.
- Wrote comprehensive technical documentation for the protocol and full-coverage unit tests using Hardhat and Ethers.js.

<https://trustpad.io/>

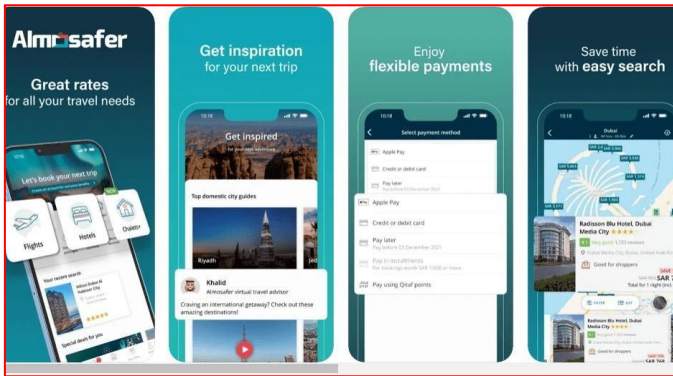

NFT Minting Site

- Gathered requirements and suggested a development plan.
- Developed an ERC-1155-based semi-fungible smart contract.
- Designed and developed testing scenarios and wrote unit tests for the smart contract.

Work Experience

React Front-End Engineer • Golden Hippo

July 2020 - December 2021

Golden Hippo Media development

- Ported the Ionic Angular sales funnel to React and GraphQL for rapid prototyping and split testing.
- Ported the underlying deprecated Ionic library to Webpack 5, speeding up local and remote builds by up to six times.
- Developed a method for file exclusion leading to a tenfold local development speed increase in the workshop.
- Ensured quality standards through regular code reviews of contractors' codebase contributions

Lead Instructor • Coding Dojo

January 2019 - October 2020

- Co-authored and piloted a React curriculum at the home campus and assisted in migrating the three-stack program from Angular (MEAN stack) to the MERN stack.
- Served as a core contributor to the program-wide Discord integration, creating a rapid two-click user sign-up process.
- Created a platform-species CLI to accurately track Zoom class attendance and push it to the program's back end. This tool was eventually adopted to track course participants on a broader basis.
- Integrated the Gmail API for sending automated, template-driven emails to students.
- Managed two other instructors on-site, supporting all aspects of instruction and campus upkeep.

Full Stack Developer • BotB

July 2018 - February 2020

<https://Botb.com/>

- Helped the company to migrate from PHP to MEAN-Stack. It resulted in increased code quality, excellent design and increased development speed.
- Helped to test and integrate best programming practices like TDD, continuous integration, and code review.
- Architected platforms to function seamlessly for dozens of clients.
- Managed client requests so that improvements requested by one client were available to all clients.
- Integrated with multiple ERP systems including iSync, BrightPearl, and AX.
- Integrated with multiple payment providers, including CyberSource, Authorize.Net, PayPal, and Braintree.

Full Stack Web & Blockchain Developer • BlockSync TrustPad

March 2019 - January 2020

<https://trustpad.io/><https://nftpad.fi/>

- Integrated REST APIs for feature improvements leading to a 20% increase in daily user engagement.
- Maintained and developed upon the entire Solidity stack. Managed several smart contract developers to coordinate feature implementation, code reviews, and protocol improvements.
- Applied protocol improvement proposals that were passed by internal governance and integrated into the protocol. These helped us achieve \$180MM in total liquidity within our protocol at our peak, including an influx of \$80MM within two weeks.
- Wrote comprehensive technical documentation for the protocol and full-coverage unit tests using Hardhat and Ethers.js.

MERN Stack Developer • Legably

February 2018 - September 2018

<https://www.legably.com/>

- *Developed a job market platform in Node.js with MongoDB and React.js.
- *Created the "Payment Integration" using Chargebee
- *Integrated Stripe API to make payments
- *Developed admin dashboard to manage users, projects
- *Developed a messaging app using Socket.io

Mobile App & Front End developer • Almosafer

Dec 2016 - March 2018

<https://www.almosafer.com/en> <https://apps.apple.com/app/id928866584?platform=iphone>

<https://play.google.com/store/apps/details?id=com.travel.almosafer&hl=en&gl=US> Built

the first generation of Almosafer mobile iOS/Android app and Website.

* Served as the architect and technical lead for the front-end development of the Almosafer hotel booking mobile application in early 2014. The new mobile app included the following main features like Search and Evaluation, Selection, and Booking. The search engine used the following parameters to get optimized search results.

- 1) Destination (city),
- 2) Dates (check-in/checkout dates)
- 3) Number of people (adults, children)
- 4) Number of rooms

* Built the view of the results module that lists the hotels that match the initial parameters. Ratings and price for rooms, also filters and sorting based on budget, reviews, reservation policy.

* Built the screen which shows accommodation details including Overview, Photo gallery, Amenities, Special offers, Review, Map, Room status

* Built the completed payment process for customer's booking. It leads a user through an easy and safe transaction via our app. Integrated credit card, PayPal payment APIs.

* Integrated Google analytics, test flights, some other third party libraries like Mixpanel, advertising SDKs and TripAdvisor.

Education

2012 - 2016

University of Szczecin

Computer and Information Science

Bachelor's degree
